PROFESSIONAL SUMMARY

Java Backend Developer with 3+ years of experience in **Java, Spring Boot, REST APIs, SQL optimization and backend integrations**. Experienced in fintech applications, performance validation, testing and database migration within enterprise systems. Familiar with Jenkins-based deployment workflows and microservice ecosystems.

SKILLS

Back End & Architecture: Java (8, 11, 17), Spring Boot, Spring MVC, REST APIs, Hibernate, JPA, OOP, Collections, Multithreading, Microservices Architecture
Data & Messaging: MySQL, PostgreSQL, YugabyteDB, Redis
Testing & Quality: JUnit (4, 5), Mockito, JaCoCo, SonarQube, Integration Testing
Build: Git, Maven, Gradle, Jenkins (Build Execution & Deployment Support), Postman.
Security & Enterprise Platforms : OAuth 2.0, JWT, AEM Sites, AEM Assets.
Familiarity : Apache Kafka(microservice ecosystem exposure) ,AI Developer Tools (Cursor, Copilot, ChatGPT,Claude,Emergent,Replit AI).

EXPERIENCE

Adobe (via Magnit) - Bangalore India

Technical Consultant (Contract)

Feb 2026 - May 2026

- Completed onboarding and platform familiarization activities within Adobe Experience Platform(AEP) ecosystem.
- Completed learning and familiarization activities around **Adobe Journey Optimizer** and Adobe Experience Platform concepts during the engagement.

Adobe - Bangalore India

Intern returnship - AEM

Apr 2025 - Feb 2026

- Migrated and validated **300+ legacy pages** across hospitality, dining and careers platforms ensuring responsiveness, accessibility and content consistency.
- Created and managed content using **AEM Sites**, reusable templates and components.
- Managed digital assets within **AEM Assets**, supporting structured storage, retrieval and content accessibility.
- Performed validation activities for SEO fidelity, visual accuracy and functional correctness during migration workflows.
- Collaborated with cross-functional teams to validate templates, components, and content structures.

Trustt (formerly Novopay Solutions pvt Ltd) - Bangalore, India

Software Development Engineer - 1

Jan 2022 - Apr 2024

- Developed backend modules and REST APIs using **Java 17 and Spring Boot** for a **microservice-based banking application**, contributing to Loan Origination System (LOS) workflows.
- Performed pre-production performance testing and optimized SQL queries, caching layers (Redis), and request-handling logic, resulting in a **25%** improvement in overall responsiveness.
- Collaborated with **Android and web application teams** to validate API integrations, troubleshoot issues and support end-to-end workflow testing.
- Built and validated integrations with **third-party SOAP and REST services**, improving reusability and reducing integration effort by **40%** through reusable interfaces.
- **Developed extensive unit tests using JUnit & Mockito**, achieving **90%+ test coverage** measured through **JaCoCo and SonarQube**, improving code reliability.
- Supported build execution and deployment verification using **Jenkins** during pre-production release processes.
- Participated in **pre-production testing, release validation and environment readiness activities** before deployment cycles.
- Contributed to migration from **MySQL to YugabyteDB**, validating compatibility of queries and backend behavior.
- Migrated document generation workflows from **JasperReports to Thymeleaf templates**, improving maintainability and template flexibility.
- Worked within a **microservice-based architecture**, gaining exposure to inter-service communication patterns and Kafka usage.
- Enhanced code quality by adhering to clean coding standards, implementing modular designs, and developing reusable utility functions that reduced code duplication by **40%**.
- Participated in requirement gathering and end-to-end testing phases to validate backend stability for **KYC verification** and **customer onboarding compliance** features, ensuring application stability prior to release.

PROJECTS

Food Delivery Application

Spring Boot, Hibernate, MySQL,JWT Authentication

- Built RESTful backend APIs using **Spring Boot** to support restaurant discovery, order placement and delivery tracking with JWT based Authentication.
- Designed MySQL database schema with Hibernate/JPA and explored frontend integration and deployment concepts through guided learning projects.

EDUCATION

Master of Engineering in Computer Science and Engineering

Anna University - Chennai • 2014 with GPA of 7.1
